Famotidine should not be used in pets allergic to it. Tell your veterinarian if your pet is pregnant since it may affect weight gain. I get that through my vet is like compound medication very expensive but worth it my kitty feels much better! The usual dose in dogs is 0. If overdose is suspected, seek emergency veterinary medical treatment. Famotidine may also be used for purposes other than those listed here. The usual dose in cats is 0. However, if you don't remember until the next day, skip the dose you missed and give only the next regularly scheduled dose. Tell your veterinarian if your pet is being given antacids, metoclopramide, Sucralfate, digoxin, or ketoconazole as interactions can occur. Is there evidence that pepcid can cause high blood glucose in dogs. For dogs and cats, if any of the following serious side effects occur, stop giving famotidine and seek emergency veterinary medical attention; an allergic reaction difficulty breathing; swelling of the lips; tongue or face; hives. I mix the powder with some water and give it to her with an oral syringe Compare prices and find coupons for Pepcid AC (Famotidine AC) at more than US pharmacies. Save up to 80% instantly!
