Fraudulent online pharmacies may attempt to sell an illegal generic version of Maxalt. Apadaz Apadaz acetaminophen and benzhydrocodone hydrochloride is an immediate release combination of When a drug like Maxalt becomes generic it is typical for the generic products to be priced much lower than the branded product. To learn more about the difference between branded prescription medications and generics, visit the Generic versus brand name section of our drug basics section. Since January generic Maxalt is available. These medications may be counterfeit and potentially unsafe. We comply with the HONcode standard for trustworthy health information - verify here. AB Products meeting necessary bioequivalence requirements. Each year, millions of prescriptions are written for Maxalt in the US. The easiest way to lookup drug information, identify pills, check interactions and set up your own personal medication records. When the patent exclusivity for a brand name product expires, often times multiple generic manufacturers will seek approval from the FDA to manufacture and sell generic versions of the branded drug. A drug patent is assigned by the U. Exclusivity is the sole marketing rights granted by the FDA to a manufacturer upon the approval of a drug and may run simultaneously with a patent. As such, most insurance plans will offer lower patient co-pays for generic drugs, like Maxalt, than they do for branded drugs. To view content sources and attributions, please refer to our editorial policy. The branded version of Maxalt became available in Drug Exclusivity Exclusivity is the sole marketing rights granted by the FDA to a manufacturer upon the approval of a drug and may run simultaneously with a patent. The patent assigns exclusive legal right to the inventor or patent holder, and may include entities such as the drug brand name, trademark, product dosage form, ingredient formulation, or manufacturing process A patent usually expires 20 years from the date of filing, but can be variable based on many factors, including development of new formulations of the original chemical, and patent infringement litigation. By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart. Often prescription medicines are referred to either by their brand name only one manufacturer holds the exclusive right to make and market the product using the brand name like Maxalt or by the generic name in this case, rizatriptan. Since January generic Maxalt is available. The patent expired in Now that Maxalt is off patent, there may be a number of manufacturers who supply generic versions of Maxalt.
