Tell your doctor if the medicine seems to stop working as well in relieving your pain. Follow the directions on the prescription label. Hydrocodone is a drug of abuse and you should be aware if anyone is using your medicine improperly or without a prescription. Stop taking Vicodin and call your doctor right away if you have skin redness or a rash that spreads and causes blistering and peeling. Ask a doctor or pharmacist before using any other cold, allergy, pain, or sleep medication. Once the pain becomes intense, the medication is not as effective in relieving it. Store at room temperature away from moisture and heat. Never share Vicodin with another person, especially someone with a history of drug abuse or addiction. Do not take if it is almost time for the next dose. Keep track of the amount of medicine used from each new bottle. Avoid driving or operating machinery until you know how Vicodin will affect you. The easiest way to lookup drug information, identify pills, check interactions and set up your own personal medication records. If you need surgery or medical tests, tell the doctor ahead of time that you are using this medicine. Foust about any other drugs you are taking, including non-prescription drugs.
