Such variation is usually inconsequential, with one exception: In the end, the variation in performance between brand names and generics is about the same as the variation between brands. Bronnenberg et al You have to believe Generics are a can't-miss bargain, and all you're paying for when you buy a brand-name drug is the pretty package, familiar name, and trusty slogan. Generic and store-brand drugs are just as rigorously tested, well-formulated, and effective as brand names. Generic drugs must be "bioequivalent" to brand-name drugs, meaning they have to show up as the same in the bloodstream and work in the exact same way. They are just less expensive so don't worry about being cheap. In one study in the British Medical Journal , women who received placebo pills labelled with a popular brand name for headache relief found them more effective than those who received the very same placebo pills labelled as a generic. Now that you know that in almost all cases , generics are exactly equivalent to the fancy brands, those misperceptions should not hold you back. About half of generic drugs are actually made by the same companies making the brand-name versions. A generic's active ingredient, dosage, and strength must be the same as its brand-name equivalent. Are generics really as good? Major companies pay for the marketing, advertising, and often development of a drug. This isn't just true of the drugs you buy in the aisle. That's true for fake medicines or placebos which patients frequently respond to when told they will ease pain or even stop asthma attacks. Healthcare workers people like your pharmacist and doctor, who should know a thing or two about the matter buy generics. When asked why, participants said they thought generics would "require higher doses" and "result in more side effects. Same drug, different price Generic drugs, both over-the-counter and prescription medications, are very strictly regulated by the Food and Drug Administration's FDA rules for generics. Generic drug manufacturers have no such costs and they pass those savings on to you.
