I don't understand the idea of Xanax XR, the idea of Xanax is to kick in real quick to help kill your panic attack. You may want to save some of that hoping to god in the event you have to wd from the xanax in the pen. Im also very interested in knowing, as i might not be able to crush the pill, my guardian may want to watch me take it. Just got the script. Not only would I crush them completely and parachute them, but I'd do two to three at once and it still somehow couldn't beat the XR matrix. Even though they're the XR's, unfortunately they're just as effective in raising your tolerance extremely quickly. I agree with TokinDerrick regarding crushing it into a fine powder than letting it sit in a high proof shot of alcohol. Just popped all 3 Jay, gonna see how it goes. Very little difference IMO. So maybe a high proof shot of something like Vodka or Gin will dissolve the matrix over a few hours. You simply can't defeat the time release. Tolerance does not build that fast.
