I was pretty confident she didn't have that kind of patience. I'd barely had a chance to sit down when Mom started right in. I suggested the mother might as well buy her kid a drink before bedtime instead. It wasn't my best moment as a physician. After all, who was I really here to see? And I think it's because that partnership was lacking from the very beginning. I shouldn't have said it. Do you already have an account? Or Mom, who demanded that all of the racket in her house -- the coughing, sneezing and sniffing -- stop because she hasn't been sleeping? In that sense, maybe we both deserved better from the encounter. She had a snooty tone, the kind that says, "I know exactly what's wrong with her," while she told me her kid's story. But if you want to get to the root of her problem, this is probably the best way to go. That's when I heard the first complete sentence out of my patient, the girl sitting on the table whom I'd almost forgotten because the mother was so overbearing. Is she just supposed to cough? We use registered International Airmail for all of our orders. What are cough and cold medicines? However, several cough and cold medicines contain ingredients that are psychoactive (mind-altering) when taken in higher-than-recommended dosages, and some people misuse them. Cough syrups and capsules containing dextromethorphan (DXM). Medscape - Cough dosing for promethazine/codeine, frequency-based adverse effects, comprehensive interactions, contraindications, pregnancy & lactation schedules, and cost information.
