Continuous use of oral steroid is associated with severe side-effects, but it has been suggested that azathioprine, an immunosuppressive anti-metabolite, often used to reduce the immune response in chronic active hepatitis and severe rheumatoid arthritis, could be useful as an oral steroid sparing agent. An update search conducted in August did not identify any new studies for consideration in the review. One study reported a statistically significant difference in SGaw, but the clinical importance of this is uncertain. Only studies with a randomised placebo -controlled design met the inclusion criteria for the review. Due to concerns over the small sample sizes and methodological shortcomings in terms of inadequate washout in one study, and methods used in outcome assessment for both studies, the findings of the studies are not generalisable to the issue of steroid tapering. Colchicine as an oral corticosteroid sparing agent for asthma Cyclosporin the drug for preventing organ rejection after transplant as an oral corticosteroid sparing agent in stable asthma Dapsone as an oral corticosteroid sparing agent for asthma Gold may have a small impact on asthma for people dependent on corticosteroids, but adverse effects are serious and a lot of monitoring is needed. Troleandomycin as an oral corticosteroid sparing agent in stable asthma. Data collection and analysis: Data were extracted and entered into Review Manager. There is a need to systematically evaluate the evidence regarding its use to reduce or eliminate oral corticosteroid usage. Two authors independently assessed studies for suitability for inclusion in the review.

Can J Ophthalmol. Apr;41(2) Combination of azathioprine and corticosteroids in the treatment of serpiginous choroiditis. Vianna RN(1), Ozdal PC, Deschenes J, Burnier MN Jr. Author information: (1)Uveitis and Ocular Immunology Unit, Department of Ophthalmology, Royal Victoria Hospital, McGill University. Birth Defects Res A Clin Mol Teratol. Jun;(6) doi: /bdra Use of azathioprine and corticosteroids during pregnancy and birth outcome in women diagnosed with inflammatory bowel disease. Plauborg AV(1), Hansen AV(2), Garne E(1). Author information: (1)Paediatric Department, Hospital. The optimal treatment for IgA nephropathy (IgAN) remains unknown. Some patients respond to corticosteroids, suggesting that more aggressive treatment may provide additional benefit. We performed a randomized, multicenter, controlled trial to determine whether adding azathioprine to steroids improves renal outcome. J Am Geriatr Soc. Mar;51(3) Azathioprine and low-dose corticosteroids for the treatment of cryptogenic organizing pneumonia in an older patient. Laszlo A, Espolio Y, Auckenthaler A, Michel JP, Janssens JP. PMID: ; [Indexed for MEDLINE]. Publication Types: Case Reports; Letter. MeSH terms. Neurology. Oct 10;67(7) Improvement with corticosteroids and azathioprine in GADassociated cerebellar ataxia. McFarland NR(1), Login IS, Vernon S, Burns TM. Author information: (1)Department of Neurology, University of Virginia Health System, Charlottesville, VA, USA. PMID: Initially 1 mg/kg daily, then increased to 2 mg/kg daily, dose is increased over 34 weeks, azathioprine is usually started at the same time as the corticosteroid and allows a lower maintenance dose of the corticosteroid to be used, oral administration preferable, if not possible then can be given by intravenous. Jan 26, - Asthma can be treated with drugs that aim to reduce inflammation in the airways. Inhaled corticosteroids are frequently used, but occasionally individuals require oral steroids for adequate control. However, oral steroids are frequently associated with severe side-effects. Azathioprine has been suggested as. 67 year old lady, known case of Hypothyroid and Hypertension on medications with history of recurrent dermatitis for which she was on corticosteroid and azathioprine for last six months, presented with acute pain abdomen. She was hemodynamically stable and her blood parameters showed increased serum levels of. contains 50 mg azathioprine BP. Orange tablet, film coated, round, biconvex, unscored, branded GX EL5. Each tablet contains 25 mg azathioprine BP. INDICATIONS. IMURAN is used as an immunosuppressant antimetabolite either alone or, more commonly, in combination with other agents (usually corticosteroids) and. Purpose:: The therapy with immunosuppressive agents is currently accepted as the best option to treat active serpiginous choroiditis (SC). Nevertheless, no consensus exists for the best immunosuppressive drug for SC. In this paper we describe the clinical course of patients with active SC treated with azathioprine (AZA) in.
