

wellbutrin prescription assistance

Advise patients and caregivers that the patient should stop taking FORFIVO XL and contact a healthcare provider immediately if agitation, depressed mood, or changes in behavior or thinking that are not typical for the patient are observed, or if the patient develops suicidal ideation or suicidal behavior. Offer expires upon program termination by Almatica Pharma Inc. The use of this card is subject to applicable state and federal law. Antidepressants increased the risk of suicidal thoughts and behavior in children, adolescents, and young adults in short-term trials. Some patients who stopped smoking may have been experiencing symptoms of nicotine withdrawal, including depressed mood. You can titrate to higher doses without adding more pills. Suicidal Thoughts and Behaviors All patients being treated with antidepressants for any indication should be monitored appropriately and observed closely for clinical worsening, suicidality, and unusual changes in behavior, especially during the initial few months of a course of drug therapy, or at times of dose changes, either increases or decreases. Algorithm Pharma Inc; You are encouraged to report negative side effects of prescription drugs to Almatica at or the FDA at www.fda.gov. However, some of these adverse events occurred in patients taking bupropion who continued to smoke. By using this offer you agree that you will not submit a claim for the prescription to any government payer. Offer is not valid for prescriptions being fully or partially reimbursed under Medicaid, a Medicare drug benefit plan, or other federal or state program such as medical assistance programs. Serious neuropsychiatric adverse events have been reported in patients taking bupropion for smoking cessation. Seizures Bupropion can cause seizure and the risk is dose-related risk. If any part of your prescription is paid for by a nongovernmental third-party payer, you attest to having disclosed this offer to your third-party payer. It is not known whether the mg dose needed to achieve initial response is needed for maintenance treatment Patients should be periodically reassessed to determine the need for a maintenance treatment and the appropriate dose for such patients. Data from a comparative trial of bupropion HCl, nicotine transdermal system NTS, and placebo as an aid to smoking cessation suggest a higher incidence of treatment emergent hypertension in patients treated with the combination of sustained-release bupropion HCl and NTS. Void where prohibited or restricted. Families and caregivers of patients being treated with antidepressants for major depressive disorder MDD or other indications, both psychiatric and nonpsychiatric, should be alerted about the need to monitor patients on a daily basis for the emergence of agitation, irritability, or unusual changes in behavior, as well as the emergence of suicidality, and to report such symptoms immediately to healthcare providers. Program eligibility and restrictions apply.
