Tags find more info read review over here cost of brand synthroid directory. Please note that while we will do our best to accommodate your room preference we can only guarantee a room category and not a specific room. I was recently switched to the name brand of Synthroid after taking the generic for 20 + years. I really didn't notice any side effects from the generic but since switching to the name brand I have begun having hot flashes and night sweats (I'm WAY past . Just about the most allergy inducing plant possible. Jan 13, - Thank you for your response. Having hit the tail end of menopause, I have already suffered hair volume loss and am not interested in experiencing any more of that! Also, I read that the generic has different fillers one can be allergic to as well as if you are prone to being lactose intolerant - not reccomened Synthroid - I was getting hives when I was taking. But I wanted to see if anyone has had any issues with a sudden allergy to synthroid. I thought it was something I was eating or generic tylenol I had just bought. . This sudden reaction is probably just a filler reaction and not a "levothyroxine" reaction based on the fact that you were fine on the generic. This article is really eye opening to say the least! It gives an ingredient in Synthroid called acacia, which is from a family of shrubs and trees, that can cause a myriad of allergy sym, teamboard. Abnormal Heart Rhythm; Abnormal Liver Function Tests; Angina; Complete Stoppage Of The Heart; Fast Heartbeat; Giant Hives; Heart Attack; Heart Failure; Hives; Inflammation Of Skin Caused By An Allergy; Mood Changes; Pseudotumor Cerebri; Rash; Seizures; Trouble Breathing. If experienced, these tend to have a. A very serious allergic reaction to this drug is rare. However, get medical help right away if you notice any symptoms of a serious allergic reaction, including: rash, itching/swelling (especially of the face/tongue/throat), severe dizziness, trouble rubeniorchids.com is not a complete list of possible side effects. If you notice other. In my case, if I took the brand when a generic is available my co-pay would go from about \$5 to \$50 - no matter what the drug was. also side effects are: Severe allergic reactions (rash; hives; itching; difficulty breathing; flushing; tightness in the chest; swelling of the mouth, face, lips, or tongue; unusual. I reacted to synthroid and the generic form as well because they both contain lactose (I am lactose intolerant) and acacia. Acacia fillers in meds for people with severe allergies like myself is not a good idea. I researched all the meds and found that Levoxyl does not contain these fillers and have been switched. My advice to. Apr 28, - Started taking Synthroid 25mcg now I'm up to mcg. Been on the higher dose for Has anyone had a allergic reaction to Synthroid? Is it possible to be allergic to yes it is i had the opposite problem i had a reaction to the generic but am fine on name brand. i broke out in head to toe hives. Back to top. Levothyroxine (Synthroid) is used for treating hypothyroidism, a condition in which the thyroid gland doesn't produce enough thyroid hormone.
