Jim Heins, a spokesperson for OxyContin maker Purdue Pharma, said OxyContin has larger amounts of oxycodone than Percodan or Percocet, in some cases more than 10 times as much. Former addict Carl Greener, 26, began taking Oxy for chronic lower back pain but was disappointed at the lack of "kick" he was used to from Vicodin and Percocet. OxyContin is prescribed to treat moderate to severe pain for patients who need around-the-clock relief. If you or someone you know is struggling with OxyContin addiction, here are some resources that can help: He was in New York in the winter his jacket, wallet and pills missing and he was "in the most pain I could possibly be in. I had gone out at night, snorted a ton of Oxy and woke up the next morning in some apartment building. In May, Purdue voluntarily took the mg dosage of OxyContin off the market, according to Heins. After he began snorting the capsules' contents, he said, he experienced the typical feelings of invincibility, numbness and euphoria abusers report, as well as a lowering of inhibitions in social situations. Though the drug is prescribed to be taken orally by patients suffering from chronic pain, abusers often chew or crush the tablets and snort them or dilute them in water and inject them to quicken the effects.
