The skin cost of flomax was hot and dry, the pulse was weak, and the general appearance was that of a child that had but a short time to live. The circulatory system was also influenced. Nine out of ten of his patients alternative to flomax are not so situated pecuniarily as to permit of a journey to a specialist, and perhaps a protracted stay in a hospital or sanitarium. The author relates the following case, which was reported at a society meeting by Dr. In Russia the consumption of tea, and Tolstoi leads inevitably to neurotic catastrophe. The distaste for solid food was such that the patients would eat nothing but bread soaked in coffee, and in this way the absorption of the poison was increased and became more and more marked. Chronic caffeism was nearly always- confounded, he said, flomax price with alcoholic troubles, particularly with those affecting the digestive and nervous systems, for the two poisons produced effects Avhich singularly resembled each other. There is no help to be got from medicine or doctors. Paralysis due to chronic coffee poisoning, said M. Gilles de la Tourette read a paper on this subject, in which he said that the symptoms due to chronic coffee poisoning should have special attention called to them, as very often they flomax 0. How many would-be operators could seat themselves before a patient, with an open text-book beside them, and correctly perform one of the classic plastic operations on the vaginal wall? In a class numbering nearly seventy I once succeeded in discovering but a bare half-dozen who understood the proper technique of a combined vaginal-inoabdominal examination, and but a small proportion of the class could satisfy me as to the soundness of their knowledge of the normal relative position of the uterus and ovaries. Yet, as regards knowledge of the progress of general medicine, these men were an exceptionally well informed lot, and probably every one could have detailed the most up-to-date treatment of typhoid fever, or made a microscopical blind examination in a manner above criticism. It has been very seldom that any member of a class could palpate the ovaries in more than five per cent, of uncomplicated cases, and even in those instances in which success crowned his efforts, it was more a matter of accident than anything else. The term, he says, serves to emphasize the connection of this fever with the fact that the food is insufficient or is entirely wanting. Very frequently a decided trembling was noticed in the limbs, also a fibrillary trembling of the lips and of the tongue, which might become generalized in the other muscles of the face. Of course, there is nothing strikingly novel about the advice to try out-of-door exercise for morbid mental conditions; but these 'hints to those about to go into hysterics' will be of use if they help to impress on us the fact that a good deal of the excitability, the irritability, and the depression which afflict so many nowadays are really of the nature of a disease and should be treated with common-sense remedies, instead of useless reproaches. Various troubles affecting the genital and urinary systems had also been observed, but they did not occur frequently. The infant had been
