Males and FnCBPs must see their doctor every month, but don't have to take the pregnancy or comprehension tests. Another criticism is that a website is not an effective pregnancy prevention program. When surveyed, many pregnant women reported that their physicians had attempted to downplay the risks of isotretinoin or violated the standards in other ways, such as failing to inform women they needed to use two forms of birth control or allowing them to substitute a single, less-accurate urine pregnancy test conducted in the doctor's office for the two laboratory-conducted blood pregnancy tests mandated by SMART. Journal of pediatric and adolescent gynecology. From the date of the second confirmatory negative pregnancy test, an FCBP has seven days to pick up her prescription. The program has been of unclear benefit and has been criticized for being overly complicated. Launch and pre-launch difficulties were common with the system jointly built by the drug manufacturers with the assistance of Covance, Inc. and approved by the FDA. Requirements of the program also mandate, per FDA requirements, monthly pregnancy tests for women who may become pregnant. Before dispensing isotretinoin, the pharmacist will check the iPLEDGE Program website to ensure the patient is authorized to receive drug.
