If there are any signs of irritation, talk to your doctor. There is an increasing body of data specifically relating to the use of Permethrin Cream for the treatment of scabies in the elderly and in view of these data it is considered that there is no need for any special precautions for use in this age group. Permethrin is not an eye irritant but contact with the eyes should be avoided because the cream itself may cause marked irritation; however, in the event of inadvertent eye contamination, the affected area should be rinsed immediately with plenty of water or, if readily available, normal saline. In the event of eye contamination, rinse with water immediately. Please note images are for illustration purposes and may differ from the products you receive. Already have an account? If the contents of the tube are swallowed by a child, talk to your doctor immediately. It helps to treat and prevent pubic lice and scabies that can cause irritation, itching, burning, and discomfort. You do not need to keep applying more cream until it can be seen on the surface of the skin. Elderly over 65 years old should apply as directed for adults and children over 2 years old but should also include their necks, faces, ears and scalps. Children between 2 months and 2 years should only be treated under medical supervision. Permethrin 5% w/w Cream - For the treatment of scabies.
