He is also an Allergan shareholder. You are already subscribed to this email. The difference is subtle but has a huge impact on two things how quickly they work and the side effects. Generic tretinoin is also available, which is the medication that you have. Manufacturers have come up with ways to make it more tolerable, less irritating and more effective. As a side note, you should know that exfoliating is extremely important for healthy, clearer, younger-looking skin. Brand-name prescription versions contain emollient moisturizers and have more-advanced delivery systems for getting the active ingredient into the skin. With so many doctors and beauty companies on a hunt for the next big anti-aging product, why do Retin-A and retinol still have so much appeal? The Skin Deep column on Nov. People use Retin-A too much, use it too often, experience negative side effects and then give up on it too soon, doctors say. They advise using the product once every three nights or once a week if skin feels irritated for a couple of weeks, then every other night, eventually working up to every night if the skin can handle it. Prescription Retin-A first became popular more than 20 years ago as an acne treatment. Whatever you choose, be sure to check back here for the latest in skincare and detailed product reviews! Hobbs said when she first started using Retin A, she broke out with severe acne. But what has earned Retin-A its long-held reputation is its ability to affect the retention of collagen. An error has occurred. View all New York Times newsletters. Jan 18, - The prescription one is tretinoin (the generic name) and the nonprescription is retinol. That one drug tretinoin comes in It turns out there isn't much difference long term between the % (weaker) and the % (stronger) over years, except the stronger ones are more irritating. Acne is different. Does the. Sep 17, - Retin-A Gel Vs Cream for Aging Skin? My Derm Prescribed Me Tretinoin.1% Cream, but I Have Retin a Micro% Gel, is There a Difference? Retin A with Skinmedica's "TNS essential serum" and differences between tretinoin gel vs rubeninorchids.com-A Tretinoin Doctor Answers, Q&A, Tips. rubeninorchids.com?tid=&highlight=generic+retina. Apparently, the biggest difference is the delivery system. Renova, Retin-A etc have more emollients and a more advanced delivery system to push the active ingredients into the skin than the generic creams. Oct 20, - My question is, what is the difference between Retin-A, Retin-A Micro, Renova, Differin, and Tazorac? -Lisa. Dear Lisa,. Prior to the development of Retin A in the 's, dermatologists basically relied upon oral Vitamin A to help treat acne, and few topical treatments (if any) helped with signs of photoaging. Feb 17, - Renova, Retin-A, Retin-A Micro and Differin all come in different strengths, so talk to your doctor about what strength is right for you. Bottom line: Do Not use Retin-A Cream or generic Renova if you have acne. If you have acne and dry or sensitive skin, try Differin before trying Retin-A Micro. If your skin can. Feb 4, - I started with brand-name Renova, then used generic Renova (in the US) and then switched to ADC cream "retino A" %. I noticed a slight difference between the brand name Renova and the generic, but very little difference between the generic and ADC's cream. My skin is normal/slight dry. If your dose is different, do not change it unless your doctor tells you to do so. The amount of medicine that you take depends on the strength of the medicine. Also, the number of doses you take each day, the time allowed between doses, and the length of time you take the medicine depend on the medical problem for which.
