It interferes at several places inside cells and on the cell surface with other positively charged atoms such as sodium, potassium, calcium, and magnesium which are important in many cellular functions. Possible Generic Eskalith side effects The possibility of side effects varies with the level of lithium in your bloodstream. In addition, lithium increases the production of white blood cells in the bone marrow. Your blood levels will be checked at least twice a week when the drug is first prescribed and on a regular basis thereafter. Immediate-release forms are taken in 3 or 4 doses per day; long-acting forms are taken twice a day. You should be careful in hot weather to avoid activities that cause you to sweat heavily. Generic Eskalith Overdose Generic Eskalith taken in excess can have serious consequences. If you are pregnant or plan to become pregnant, inform your doctor immediately. Why Generic Eskalith should not be prescribed? Do not change from one brand of lithium to another without consulting your doctor or pharmacist. If you are sensitive to or have ever had an allergic reaction to Generic Eskalith or similar drugs, you should not take this medication. While taking Generic Eskalith , you should drink 10 to 12 glasses of water or fluid a day. How does Product work?

Aggressiveness Elation Fast, urgent talking Frenetic physical activity Grandiose, unrealistic ideas Hostility Little need for sleep Poor judgment Once the mania subsides, Generic Eskalith treatment may be continued over the long term, at a somewhat lower dosage, to prevent or reduce the intensity of future manic episodes.
