Terramycin Eye Ointment is used to treat primary and secondary infections of the eye in small and large animals. Used it on a couple of animals thus far and a little leary to start, I have to say - it works like a hot damn! Comes in two bottles. My cats and kittens seem to come up with eye infections frequently - so the little tube of Terramycin is always where I can grab it quickly - and is replaced, thanks to your quick shipping! Went to Jeffers to get it and started treatment right away and you could see a difference in their eyes within a couple of days. I have used this for years, it is excellent. Both of my Yorkie's have bad allergies and their eyes get very dried out and very dark around them. Contains 5 mg of Terramycin per gram. View Full Product Details. TT from Panama City. How we 1 Package Oxytetracycline Hydrochloride, Polymixin B Sulfate. For control and treatment of specific diseases in poultry, cattle, swine, sheep and bees. Administer in the drinking water at a level of 10 mg oxytetracycline HCl per pound of body weight daily. This packet will treat lb. of swine, cattle or sheep at 10 mg/lb. Jul 31, - The recommended dose for goats is 10 mg. per pound of body weight. It took us quite a bit of math to figure this out, do the conversions, etc. in order to mix this powder, but I believe we finally were able to figure it out. Based on the fact that oz. of powder = 10 gm. of Tetracycline, oz. of powder = 1. Swine: For the treatment of pneumonia, joint-ill and navel-ill.
