At Capri, our industry expertise and proven design process make even the most complex projects easier. The authors make no claims of the accuracy of the information contained herein; and these suggested doses are not a substitute for clinical judgment. The tendency toward tachyphylaxis lessening of response with repeated administration given more frequently than every 48 hours should be considered in treating each patient. This formulation is administered subcutaneously or by direct intravenous injection. Particular attention should be paid to the possibility of the rare occurrence of an extreme decrease in plasma osmolality that may result in seizures which could lead to coma. Whether you prefer the advantages of design-build, or want to stick to a traditional bid process, we are committed to delivering cost-effective options to stretch your budget now and lower the cost of ongoing maintenance. Licensed in 10 states, our staff brings more than half a century of experience in concrete contracting and water technology to your project. Lab Values - A thru Z. Contact Capri today to learn more. We specialize in aquatic centers, water parks, natatoriums, municipal swimming pools and a variety of recreational centers. The necessity for repeat administration of desmopressin acetate or use of any blood products for hemostasis should be determined by laboratory response as well as the clinical condition of the patient.
