Do not leave in a car, on window sill or in bathroom. Your doctor or pharmacist is the best person to give you advice on the treatment of your condition. Your doctor may reduce your dose of Puri-Nethol if you have kidney or liver disease or you are taking any other medicines that can cause a decrease in the body's ability to produce white blood cells and platelets, such as other cytotoxic medicines. To prevent irritation it is important to wash your hands immediately after handling or halving the tablets, to avoid contact with the eyes and be careful not to inhale any particle of the tablet. How do I store Puri-Nethol? When a prescription is dispensed as a private prescription you do not receive any safety net contribution toward your PBS safety net. If you take too much Puri-Nethol or if someone else takes your medicine by mistake, tell your doctor immediately. The resource to the URL or file is currently unavailable. Like other medicines, Puri-Nethol can cause some side effects. The dosage should be carefully adjusted to suit the individual patient. If you are taking allopurinol, your doctor should decrease your dose of Puri-Nethol to a quarter of the usual dose. Do not be alarmed by this list of possible side effects. Otherwise, your doctor may think that it was not working as it should and change your treatment unnecessarily. You must not take Puri-Nethol if:
