A substantial minority of the public appears willing to accept considerable risk to gain greater access to pharmaceuticals. Since the passage of the Illinois Methamphetamine Precursor Control Act and the subsequent federal Combat Methamphetamine Epidemic Act of , the purchase of pseudoephedrine is restricted. In the Netherlands , there are four categories: Furthermore, some Schedule V controlled substances may be classified as OTC products in certain states. National Association of Pharmacy Regulatory Authorities. A study has been done examining consumer's perceptions about the risk of and access to nonprescription medication. Drugs in the AV category can be sold at supermarkets , gas stations etc. A prescription is not required for [P] medicines, and pharmacy sales assistants are required by Royal Pharmaceutical Society codes to ask certain questions, which varies for what the customer says. In many countries, OTC drugs are selected by a regulatory agency to ensure that they are ingredients that are safe and effective when used without a physician 's care. The term over-the-counter may be somewhat counterintuitive , since, in many countries, these drugs are often placed on shelves in self-service areas of stores, like any other packaged products. Pharmacy-only products are marked with [P]. Some medication available in supermarkets and petrol stations is sold only in smaller packet sizes. Regulations detailing the establishments where drugs may be sold, who is authorized to dispense them, and whether a prescription is required vary considerably from country to country. While they are legally classified as OTC drugs, they are typically stored behind the counter and are sold only in stores that are registered with their state. Some states may have more stringent requirements such as Oregon , where a medical prescription is required to purchase any quantity of pseudoephedrine. If they ask for a specific product, the pharmacy assistant must ask "Who is it for," "How long have you had the symptoms," "Are you allergic to any medication," "Are you taking any medication" 'WHAM' questions.
