The good news is that beta blockers, and particularly Propranolol, are often prescribed for anxiety. Anxiety is a traitorous companion and - believe me - there's very little it can't cause. Why not start a new discussion? I really need to because I get bad heart palpitations and my anxiety goes through the roof when that happens. I've found that while it's always wise to listen to what your body is telling you. If so, I would call. What's your bp running since you started it before the side effects started. They go in the leaflet when it's found that a number of people felt the same effect s. I've been able to get to sleep but I've only been getting under 5 hours and awaking suddenly. I've had to go up on my clonazepam to control it, but I sure didn't want to. To help me through this, on wednesday my doctor gave me 40mg Propranolol to be taken 3 times a day. Could this be because of the propranolol? It is a blast of these that makes us feel anxious, especially as our heart rate increases.

May 15, - Panic disorder is a distressing and debilitating condition with a familial tendency; it may be associated with situational (agoraphobic) avoidance. The diagnosis of panic disorder requires recurrent, unexpected panic attacks and at least one of the following characteristics: persistent concern about having an. Reviews and ratings for propranolol when used in the treatment of panic disorder. 33 reviews submitted. Some individuals with anxiety have used beta-blockers off label as a treatment for their panic disorder. Off label means that beta blockers are not approved for this use, but used anyway. In this article, we'll explore the use of beta blockers for panic attacks and anxiety, and explain why they are probably not a good idea. Jun 15, - Katy prior propranolol detail. Hi I'm Katy and I'm in sixth form. I was suffering with regular panic attacks and extreme anxiety, and had heart palpitations which would often cause the panic attacks because I didn't know what they were. My GP and CAMHS case manager diagnosed me with panic disorder. The response to diazepam and propranolol hydrochloride was compared in 21 patients who (with one exception) met DSM-III criteria for panic disorder and agoraphobia. Each drug was administered for two weeks in double-blind fashion according to a crossover design. The response to diazepam was significantly superior. Feb 4, - It's a mystery to me. It works well, and as you say, is practically non-addictive. It's a beta- blocker used to control hypertension, atrial fibrillation and other cardiac dysfunctions. It slows and strengthens the heart rate. It's been arou. The beta-blocker works by blocking the action of organic chemicals, such as epinephrine. Therefore, propranolol has been explored as an off-label treatment for epinephrine-induced anxiety attacks or panic attacks. This review of propranolol for anxiety disorders will look at studies that include panic disorder with or without. May 4, - EDITORBarr Taylor clearly shows that selective serotonin reuptake inhibitors (SSRIs) are well accepted as first line treatment for panic disorder.1 However, many patients are still prescribed propranolol along with diazepam as first line treatment in primary care trusts to treat the View Full Text. Jan 22, - How effective this new memory-disrupting approach will be in treating more serious anxiety disorders like PTSD or panic is unclear. A few preliminary studies using propranolol in PTSD showed mixed results. Some found no effect, but a review of PTSD treatment studies published in Biological. Hi, again me. Today my therapist prescribed be propranolol for my anxiety and panic attacks? Is this good medication for my anxiety and panic attack? I read on Wikipedia that it is used for BP, arrhythmia etc etc. Can this medication make problems to my heart? Thanks. DigiSoft: Full Member: Posts: Highest dose of propranolol?
