Present condition satisfactory. For the references on self-infection I am indebted principally to the very able papers by Dr. Final functional result excellent. Sept 7 Russia Sai Btov Sept. Condition after the operation excellent. Patient appeared much older. Among the remoter consequences of partial prostatectomy, the effect upon the sexual function must be considered. Operation required about ten minutes. It would seem probable that sexual vigor Spray Nitroglycerin will not be lessened, but it may be that fecundation will Sublingual Nitroglycerin not take place. While some improvement occurred, the cystitis remained almost as serious as before. Patient, however, finally left the hospital before the fistula was closed. About six weeks after leaving the hospital, he returned complaining that he could not satisfactorily retain the water. And, since it is the posterior and lateral parts of the gland that are, apparently, the cause of most, if not all, of the functional disturbance, the operation may, Ntg Nitroglycerin with reason, be confined to them. Pyelonephritis of an acute form occurred, complicating the recovery.
