Apr 29, - The Food and Drug Administration sees no difference between brand-name and generic medications for depression. In general, he says, they've been very good. When their medication was switched to the generics -- paroxetine and citalopram they experienced a relapse of their depression. does anyone know or have any kind of knowledge as to whether different brands of Citalopram can cause different reactions/side effects?? A friend of mine has been on Cit. apparently, it's the coating. Best to ask the pharmacist and, yes, worth going to your friend's one just to see if you feel any differently. Jun 2, - I have a question about Celexa/Citalopram - does anyone know if these two are equivalent? I've been on Mainly, I feel like my concentration is not as good/worse since I got the refill than it was before, and I'm more anxious than before. Most people do just fine with generic drugs >> the name brand. For Anxiety and Stress "Sure just take a pill and your life is going to be good. I went to You just need exercise and good nutrition and it will change your life (I think). I currently take Seroquel (Quetiapine) mg, and was not sure why the Psychiatrist would prescribe the Celexa (Citalopram) as I had been informed by a. Zoloft (sertraline). Prescription only. Improves mood. Celexa (citalopram) is good for treating depression and anxiety. Side effects are less likely to happen compared to other antidepressants; however, it is not the best choice for people with heart or liver problems. 00000. / 5 average rating with reviewsforCelexa. Cymbalta (duloxetine) is good for treating depression, anxiety, and some forms of chronic pain, but it is more likely than other antidepressants to cause problems if you drink alcohol or have high blood pressure. Celexa (citalopram) is good for treating depression and anxiety. Side effects are less likely to happen compared. Citalopram is an antidepressant medication that affects neurotransmitters, the chemicals that nerves within the brain use to communicate with each other. Neurotransmitters are manufactured and released by nerves and then travel and attach to nearby nerves. Thus, neurotransmitters can be thought of as the communication. A few years later when the generic came out I tried citalopram for almost a month. It felt like a dark cloud came over me. I felt irritable and in a dark place. I switched back to the brand name Celexa and started to feel really good again. It is the only antidepressant, anti anxiety drug that has ever helped me. I get prescribed the. Citalopram is an antidepressant drug of the selective serotonin reuptake inhibitor (SSRI) class. It has U.S. Food and Drug Administration approval to treat major depression, which it received in , and is prescribed off-label for other conditions. In Australia, the UK, Germany, Portugal, Poland, and most European countries. Citalopram HBr occurs as a fine, white to off-white powder. Citalopram HBr is sparingly soluble in

is generic celexa just as good

water and soluble in ethanol. Celexa (citalopram hydrobromide) is available only in tablet dosage form. Celexa 10 mg are film-coated, oval tablets containing citalopram HBr in strengths equivalent to 10 mg citalopram base.
