A Consumer Reports article said that Medicare could save billions of dollars by switching to generic statins. The study received grant support from drug manufacturer Teva Pharmaceutical which makes both generic and brand-name drugs and acknowledges that the results may not be generalizable for certain populations: Statin Answers presents scientifically grounded, yet easy-to-understand facts about these drugs. Aetna, the third-largest U. UnitedHealth will charge patients less for the brand-name drug because Merck is offering to sell Zocor for less than the price offered by Teva, said Mark Lindsay, a spokesman for the Minneapolis-based insurer. The generics are expected to be a bigger part of healthcare in the future. The day exclusivity period does not apply to authorized generics. As a result, the amount of time before a generic version of any particular branded product is available varies based upon the product. We strive to be an unbiased source of information. About Us Spanish Sitemap. He declined to disclose the reduced price. Some insurers, such as Aetna Inc. While some patients may claim or believe that there is a difference between branded and generic versions of the same drug, when clinical study participants are not aware of this distinction, the two versions perform equally across studies. Statin Answers Sorting through the science. In addition, the generic company can rely on verification tests conducted by the branding company to show that the active ingredient and its strength are safe and effective, thus lowering regulatory approval costs for the generic company. The company also misled government investigators. If the generic manufacturer wants to sell its product before the patents on the branded product have expired, it must show that its version of the product and its manufacturing method do not violate the patents held by the branded company or that the patents of the branded company are not enforceable. Teva may begin selling its generic copy of Zocor as early as today, when the drug loses patent protection. A new study in the Annals of Internal Medicine found that the cost difference between generic and brand-name drugs seems to be a big factor when it comes to sticking with a medication especially when it comes to statins, one of the most-prescribed drugs in the country. "Statin" is a class of drugs that lowers the level of cholesterol in the blood by reducing the production of cholesterol by the liver. (The other source of cholesterol in the blood is dietary cholesterol.) Statins block the enzyme in the liver that is responsible for making cholesterol. This enzyme is called ?What are statins, and how ?What are the side effects of. Simvastatin (Zocor) is an inexpensive drug used to lower levels of cholesterol and triglycerides in the blood.
