The active ingredient in Tylenol is paracetamol, also known as acetaminophen, a widely used over-the-counter analgesic pain reliever and antipyretic fever reducer. On September 29, a "Tylenol scare" began when the first of seven individuals died in the Chicago metropolitan area after ingesting Extra Strength Tylenol that had been deliberately contaminated with cyanide. Death from hepatic failure occurs four to 18 days after ingestion. Something to think about no? Joseph Aspirin and Tylenol. Other than that I use them for what they are for I also want to add that death by liver failure would be an extremely unpleasant way to die, if that is the intention of the thread starter. To avoid competing with aspirin, they marketed it as a product to reduce fever in children, packaging it like a red fire truck with the slogan, "for little hotheads". In this ad, Susan Sullivan told the consumer that Tylenol was a drug that could be trusted by Americans since many doctors also trusted it; she went on to state that doctors prescribed Tylenol four times more often than other leading pain relieving drugs combined. And do I still think this is cheating death? Two brothers took over the company from their father that year, and that year one of them learned about paracetamol, which was not on the US market at that time. Wikimedia Commons has media related to Tylenol. You've been signed out due to inactivity, but it's easy to pick up where you left off on Walgreens. In an older commercial from, Tylenol emphasized that it is the drug that American hospitals trust the most. Because I'm in a similar boat to TeddyBarkoRn. Im pretty sure nything in excess can kill you.
