You want to stop the pill mills. Prescription oxycodone now reigns supreme. It doesn't help that in Florida, you don't need to be a doctor to run a pain-management clinic, Lamberti says. A commissioner in one city, Delray Beach, wants to require patients to be fingerprinted when they pick up their pills, for better monitoring. But this is not a retail outlet. Alarmed by the spread of the clinics, Palm Beach County commissioners just passed a moratorium to keep new clinics from opening while officials try to hammer out a solution. Maybe we have better beaches, I don't know. At the same time, you don't want to stop legitimate patients from getting pain management. The last figure is equivalent to about 10 reported deaths a day. Other local governments are passing similar moratoriums. The clinics are coming under more fire than ever. The Broward County grand-jury report concluded that the monitoring program should be "swiftly implemented and adequately funded, by any means necessary. The waiting room at Broward Pain Clinic is swarming. The nation's top 25 oxycodone-dispensing doctors were all in Florida in the first half of ; 18 of them were in Broward County, according to a Broward County state attorney grand-jury report. Action must be taken, he says, because anyone can end up ensnared by addiction, given how easy it is to get pills.Florida KEITH WILLIAMS MD Pain Medicine.
