There are no cranial abnormalities, no glandular enlargements. The electrical examination of the muscles reveals a marked hyposensibility to electrical stimulation of both nerves and muscles of the legs for the faradic and galvanic currents. There is hippus of both pupils. This condition progressed very gradually ; the left leg also began to feel weak, and the weakness of both legs necessitated her helping with her arms by pulling upon the hand-rail in ascending stairs. Trephining for Abscess of the Brain. Exploratory Trephining for Epilepsy. These symptoms have come on only in the past two years. Some nine years ago, about the time of her menopause, she felt very nervous and excited and at this time drank large quantities of alcoholic drinks. She is mentally normal and there is no disturbance of function of the cranial nerves. Ferrier, docteur en medecine de la Faculty de Paris. The family history is negative. The muscles are flaccid, atrophic, and soft.

Crestor or Rosuvastatin helps to maintain a healthy level of cholesterol. It does this by lowering the level of LDL or low-density lipoprotein cholesterol and boosts the level of HDL cholesterol (high-density).
