If you are concerned about side effects, discuss the risks and benefits of this medication with your doctor. Take control of your health.9 Oct - I have had my doc for a long time and have been treated for low thyroid (a condition which can also contribute to high cholesterol). My cholesterol. 14 Oct - My doctor has been treating me for years for low thyroid. Now she has put me on a statin, Crestor,(for high cholesterol) and I am concerned because there seems to be some indication that those with low thyroid should either avoid or be watched carefully whiile on Statins. Does anybody know more about. Your chances of getting muscle problems are higher if you: Are taking certain other medicines while you take CRESTOR; Are 65 years of age or older; Have thyroid problems (hypothyroidism) that are not controlled; Have kidney problems; Are taking higher doses of CRESTOR. Liver problems. Your health care professional. Third, although the patient's initial response to rosuvastatin monotherapy was good (Table 1), in our experience, hypothyroidism-induced dyslipidemia sometimes is resistant to lipid-lowering therapy. This is true whether a patient has an underlying primary dyslipidemia that is exacerbated by hypothyroidism or a purely. 17 Feb - Monitoring your thyroid function is done with a thyroid stimulating hormone (TSH) lab test to ensure the proper level of thyroid replacement. This becomes challenging when the These are your cholesterol lowering drugs like atorvastatin (Lipitor), simvastatin (Zocor) and Crestor. In a recent study of 11, Recently it has been observed that many people on statins have been referred for special radioiodine studies because they have been found to have low to no thyroid stimulating hormone (TSH) in their blood tests. Usually a low serum TSH suggests hyperthyroidism (overactive thyroid function) but these low TSH patients. Warnings About Crestor. Crestor should never be taken by people who are allergic to it or by women who are nursing or pregnant. Patients who have diabetes, a thyroid disorder, or liver or kidney disease should use extreme caution when taking this drug. Although it is highly unlikely, Crestor may cause severe damage to.
