Search options and examples. Has anyone ever taken Anafranil for panic disorder and GAD? If so, did it work well? Send a private message to purplepie. I'm going through hell at the moment with severe panic. They will then review this post with the posting guidelines in mind. BB code is On. Clomipramine is a great medication for OCD - pretty much the 'gold standard' in its treatment. I believe the Prozac has pretty much done everything it can and the Abilify is making me extremely restless and anxious to the point of panic. I have tried a few ssri's but they really don't agree with me and made me feel worse and not better, I have been on lofepramine which is another tca but clomipramine has been much better. I tried it for 9 days but had to stop because of the side effects mainly visual and GI - however, as I'm having a hard time on my current meds anxiety, agitation and akathisia I'm kind of tempted to go back to it None of the above has really helped. Posted by jms on August 26, , at 8: I've thought about going back to Zoloft which worked over 10yrs ago . try something completely new to the market possibly Brintellix , or go with a TCA such as Anafranil. I can't take benzos as I've built up an addiction to them through taking to much Valium. The Cymbalta worked as well, but eventually started losing it's effectiveness. What are you taking the Abilify for? I have been on them over a year and I was down to 10mg but I started feeling tired with no motivation so doc said lets try going up rather than down on them. Switch to Hybrid Mode. Anafranil clomipramine is really helping.Reviews and ratings for clomipramine when used in the treatment of panic disorder. 16 reviews submitted. Reviews and ratings for anafranil when used in the treatment of panic disorder. 6 reviews submitted. May 15, - Imipramine (Tofranil) is the medication for panic disorder that has been most thoroughly studied, with at least 10 double-blind, placebo-controlled studies supporting its efficacy in the acute treatment of panic disorder.6 Clomipramine (Anafranil) has shown similar results in several double-blind trials as well. J Clin Psychopharmacol. Feb;9(1) Panic attacks and agoraphobia: low dose clomipramine treatment. Gloger S(1), Grunhaus L, Gladic D, O'Ryan F, Cohen L, Codner S.
