Side effects associated with Boniva include: Boniva helps slow or stop the natural processes that dissolve bone tissue; it binds with and stays in your bones throughout the month. An analysis of side effects showed an increased risk of atypical fractures when used longer than five years. In clinical studies, 9 out of 10 women had improved bone density after 1 year on Boniva. In fact, Boniva is clinically proven to not only maintain bone density, but actually works with your body to help reverse bone loss. Boniva is designed to decrease activity of the cells that cause bone loss after menopause, with just one tablet a month. Boniva Side Effects Boniva is typically prescribed to postmenopausal women to treat osteoporosis. Wait at least 1 hour 60 minutes before eating or drinking anything except plain water. The FDA also issued new safety guidelines in September for the use of these medications, along with a recommended time limit of three to five years for using them until more conclusive data on the dangers is obtained. The more information our attorneys have the better they can evaluate your potential claim. We are not a law firm. Take Boniva first thing in the morning.
