Metronidazole should be given to your pet for the entire length of time prescribed by your veterinarian. Rated 5 out of 5 by Sam from Excellent Results This medication on a regular basis is critical to our dog's ability to maintain a healthy digestive system free of uncontrolled diarrhea. Do not give this medication if your pet is allergic to metronidazole, or if your pet is pregnant. What happens if I overdose my pet on metronidazole? Cats and Dogs Benefits: Metronidazole is an antibiotic that will act on certain bacteria. Do not start using a new medication without telling your veterinarian. However, if it is almost time for the next regularly scheduled dose, skip the missed dose and give the next one as directed. Our Collie has inflamed gums and we considered doing a dental procedure, but she is 13 years old. Do not give in larger amounts or use it for longer than recommended by your veterinarian. Your veterinarian may want to perform blood tests on a regular basis to make sure the medication is not causing harmful effects. Metronidazole is an important part of her overall program. The actual dose and duration of treatment depends on the specific condition being treated. Even though she passed the blood tests to have the dental we declined to do it due to her age. Symptoms of overdose may include nausea, vomiting, dizziness, loss of balance or coordination, or seizures. The actual dose and duration of treatment with metronidazole depends on the specific condition being treated. Give the missed dose as soon as you remember. Tell your veterinarian if your pet is pregnant or lactating, or if you plan to breed your pet. Thanks for your question. What should I avoid while giving metronidazole to my pet?Metronidazole (Metrocream, Metrogel, Metrogel-Vaginal, Metro lotion, Flagyl) is an inexpensive drug used to treat certain kinds of bacterial and protozoal infections.
