The small white tablets can be swallowed whole, crushed and snorted or mixed with water and injected. Not long after, though, Greener found that he had to take two or three doses just to get up enough energy to clean his apartment. Paramedics arrived and told them their friend had been dead for several hours. The National Institute on Drug Abuse notes that chronic use of drugs such as OxyContin can lead to physical dependence and severe withdrawal symptoms if use is stopped, including insomnia, diarrhea, vomiting, cold flashes with goose bumps, and involuntary leg movements. Though the drug is prescribed to be taken orally by patients suffering from chronic pain, abusers often chew or crush the tablets and snort them or dilute them in water and inject them to quicken the effects. It's hard enough to move on - this makes it even harder. It has moved from being abused in mostly rural areas to more metropolitan areas. The abuse of prescription drugs is growing among teenagers who use them to enhance the effects of alcohol. In a recent report, America's drug tsar John Walters found that while the price and purity of drugs such as heroin and cocaine had remained stable in recent months, the abuse of OxyContin had risen rapidly. Jim Heins, a spokesperson for OxyContin maker Purdue Pharma, said OxyContin has larger amounts of oxycodone than Percodan or Percocet, in some cases more than 10 times as much. He was in New York in the winter his jacket, wallet and pills missing and he was "in the most pain I could possibly be in. The manufacturers are also deeply concerned. Within half an hour she had passed out and her friends lay her down on a mattress to sleep it off. Soon after she had paid for her first portfolio of professional pictures, she joined a few friends for a night out on the town. Topics UK news The Observer. In parts of the Appalachian valley in the US, 80 per cent of crime is believed to be OxyContin-related. The idea was that patients would need only two tablets a day rather than six or seven as is the case with other painkillers. Large doses can cause severe, potentially fatal, respiratory depression. You may have never heard of it, but the prescription painkiller OxyContin is addicting or killing an increasing number of young people. So [addicts] are much more prone their entire lives to use this medication more than a person who has never felt that euphoria.
