This past months I have had several Tia's. Read our disclaimer and note that no information on this Forum should be viewed as a substitute for medical advice or as a consultation with a medical doctor: Vitamin K is key in the coagulation pathways responsible for the clotting of blood , and with less activity of Vitamin K blood takes longer to clot. My Doctor wants me to NOT take the generic form, but medicare and our supplemental insurance refuse to pay for the Olavix I have been on Olavix for at least 15 to 20 years after a stroke, up till this year and never had any problems. Too little, as well as too much warfarin can be dangerous. Warfarin works by counteracting Vitamin K in the plasma of the blood. Any programs available to help people who need to take brand name Plavix? Please post here or e-mail me. Different situations require different levels and types of anticoagulation. We are concerned he will die on the generic but cannot afford the brand Plavix on our own. Org , February 15. Some patients have reported side effects in other Forum Topics with the generic that they had not experienced with brand name Plavix, so we have collected those into this new topic. I am a real person and not a spambot The following information is optional. Because clopidogrel and Plavix are the same drug, although there have been some reports that generic Plavix clopidogrel may have some different properties. Plavix is a drug known as an anti-platelet drug. When clots form, platelets stick to each other as part of the clotting process. Hello, I am having a problem with the generic form of Plavix also. My Doctor wants me to NOT take the generic form, but medicare and our supplemental insurance refuse to pay for the Olavix I have been on Olavix for at least 15 to 20 years after a stroke, up till this year and never had any problems. This past months I have had. Plavix is a brand name drug that was developed by Bristol-Myers Squibb and that is known by the generic name clopidogrel. That may prove to be a big problem for the company now as evidence is coming to light that this risky drug, which can cause fatal bleeding, may not be any better at preventing deaths from blood. May 18, - The reasoning is that the generic may vary in potency from a name brand. Every medication has a therapeutic range where it is effective. Below that range, it is less effective or non-effective. Above that range, untoward side-effects are more likely to occur. In the case of Plavix, internal bleeding can occur. Jan 24, - Manufacturer International Laboratories LLC has issued a voluntary recall of one lot of clopidogrel, the generic for Plavix. This is a class II recall, the most At this time, International Laboratories LLC has not received any reports of adverse events associated with this recall. What has been done to alert. May 21, - Clopidogrel users can now buy Plavix or an equally effective generic version in a mg dose at a much lower price. But the biggest threat to clopidogrel is not cost, generic competition, side effects, or lack of efficacy. It is likely that clopidogrel by any name will continue to save lives for years to come. Oct 10, - Only a tiny fraction of all adverse drug reactions are ever reported to the FDA. In order to truly alert the FDA to a problem with a product they've approved, they must be notified by as many people as possible who believe they have experienced a side effect. So, any time you believe you've had a bad drug. In the United States, patent for branded Plavix has recently expired. Some studies have compared branded and generic clopidogrel in terms of pharmacokinetic parameters in healthy volunteers, but data on patients and clinical outcomes are scarce. We aimed to review efficacy and safety data from studies comparing Plavix. Jul 26, - Although generic clopidogrel is widely used, clinical efficacy and safety between generic and original clopidogrel had not been well evaluated. . TVR was defined as any repeated PCI or surgical bypass of any segment within the entire major coronary vessel that was proximal and distal to a target lesion. May 20, - Generic versions of blood-thinning medication - Plavix (clopidogrel bisulfate) - have been approved by the FDA (Food and Drug Administration). Clopidogrel bisulfate reduces the likelihood of blood platelets clumping together and forming clots in blood vessels, resulting in a lower risk of stroke and heart. Plavix (clopidogrel bisulfate) is a thienopyridine class of drug that inhibits platelet aggregation and thus inhibits aspects of blood clotting used to treat patients with acute coronary syndrome, myocardial infarction (MI), peripheral vascular disease and some stroke (ischemic type) patients. Plavix is available in generic form.
