Don't make your child suffer just because you are philosophically opposed to giving them drugs. Many doctors still refer to this condition as ADD. Kids with ADHD know that they are different. These patients are able to pay attention, but they are unable to sit still. The trouble is that your child may start to believe he is defective because of the friction he is constantly involved in. You could be the smartest kid in the class but you are always getting into trouble. They begin doing things that they had procrastinated over before such as balancing their checkbooks or putting away their laundry or returning library books. They hate going to school. The information contained on this web site is for your information only. Their attention span increases and they seem more focused.
