I'm bipolar but ADD too. My usual approach when a new drug comes out is to wait, preferably a year, two if I can stand it, and let other doctors and their patients find out what the drug is really like before I use it -- as long as there are some pretty good options among the medications we already have available. However, I've also had some folks with bipolar disorder who also seemed to have ADD on top of it, i. Available for Android and iOS devices. This drug has had tremendous benefit for me at times with also some unwanted side effects. Still looking for answers? View top members Find a member.
