To keep the levels of DHP low you must continue to take Finasteride on a daily basis. The effect tends to wear off in quitting the administration of Finasteride. The drug related side effects may include loss of sexual desire and erectile problems as well as decreased seminal fluid production. Effects are different from patient to patient, but unfortunately you may not grow all the hair you have lost due to pattern baldness. Finasteride works by blocking the formation of a chemical named DHT that interrupts the male pattern baldness process. Generally you need to take Finasteride once a day for 3 - 6 months before you start experiencing the effects. Finasteride blocks the production of DHT and thus protects the hair follicles that produce hair. Finasteride works most effectively for men with mild to moderate male pattern baldness.
