According to FDA policies, ophthalmic generic products introduced prior to did not have to match the inactive ingredients of the innovator. The easiest way to lookup drug information, identify pills, check interactions and set up your own personal medication records. The patent assigns exclusive legal right to the inventor or patent holder, and may include entities such as the drug brand name, trademark, product dosage form, ingredient formulation, or manufacturing process A patent usually expires 20 years from the date of filing, but can be variable based on many factors, including development of new formulations of the original chemical, and patent infringement litigation. Lane adjunct professor of ophthalmology, University of Minnesota, Minneapolis, and medical director, Associated Eye Care, Stillwater, MN summed up his preference for prescribing brand name products as being based on a focus to provide the best possible care. Furthermore, prices of generic medications have been on the rise recently, narrowing the cost difference between branded and generic medications, and that trend may continue if more rigorous FDA standards for generic medications are implemented, Dr. September 28, Strength s: The unfortunate consequences of this situation are well-known to ophthalmologists through the experience with the generic topical diclofenac product that was responsible for corneal melts. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart. Due to patent protection, the latest brand name products have no generic equivalent. Mah also noted that the reduced dosing frequency with the newest NSAIDs has safety value because it minimizes ocular exposure to preservatives. Drug Exclusivity Exclusivity is the sole marketing rights granted by the FDA to a manufacturer upon the approval of a drug and may run simultaneously with a patent. Lane, MD, and Francis S.
