Acetaminophen is the most commonly used medication for pain and fever in infants and children. It makes your nose feel less stopped up by narrowing the blood vessels inside your nostrils. There is a number of reasons for that. Here's just one story: Sakina Bajowala, an Illinois-based allergist, explains. Pharmacists are well aware of this and most pharmacies do require that staff work on only one patient's medications at a time. Claritin is long-acting, with effects that last for 24 hours. Who Should Report an Error? Each month, the pharmacy then notifies you when they are ready to be picked up. Second-generation over-the-counter medications like Claritin, Zyrtec, and Allegra which improve upon old options like Benadryl by not putting you to sleep are more similar than they are different. Pseudoephedrine's usefulness when making methamphetamine means that in the United States, these drugs need to be purchased directly from the pharmacist with a government ID.
