For the options below, you will be required to post your paper prescription, what is this issued by your doctor to us, before we send you any medication. Ciprofloxacin is usually prescribed for respiratory tract infections, urinary tract infections, infections of the gastro-intestinal system, bone and joint infections, and sexually transmitted infections such as chlamydia and gonorrhoea. Ciprofloxacin can affect your reaction times, particularly at the start of treatment, and especially if combined with alcohol. Ciprofloxacin may not be suitable or may need to be used with caution if you are taking some medicines such as methotrexate, tizanidine, theophylline, clozapine, ropinirole, or anticoagulants such as warfarin. Select Please select an option. Other uncommon side effects include anorexia, agitation, disorientation, headaches, sleep disorders, muscle pain, and skin rashes or itching. Ciprofloxacin What is Ciprofloxacin? You must have JavaScript enabled in your browser to utilize the functionality of this website. It is not related to penicillin.
