

fybogel mebeverine buy

Prevention of constipation and non-medicinal treatment depends on the cause. Reduces constipation Provides relief from IBS symptoms Easy two to three a day dose Constipation is a condition which can have any number of causes, and is characterised by a severely reduced bowel frequency. This condition is, in simple terms, an increased susceptibility to bowel problems, which can cause difficulties digesting food. Is it right for me? Do not take it if you are allergic to any of the above ingredients. Type your product review in the space provided. Fill in our medical questionnaire to have your case reviewed by one of our practitioners. Fybogel is widely used for the relief of constipation. Flatulence and feelings of bloatedness may occur within the initial few days of treatment, but these should dissipate after a short period. More detailed instructions can be located in the leaflet supplied with the product. All you need to do is fill in our confidential medical questionnaire, and your answers will be assessed by one of our GPs. In the case of IBS, it may be necessary to identify those specific foods which trigger symptoms, and limit or even stop their consumption. The first of these is a fibre, which works as a laxative to provide bulk to the food present in the gut. Do not take this item if you have: Please read the patient information leaflet for this medicine fully before use: Would you recommend this item to others? We know it can be tricky seeking medications for some conditions in person, or simply inconvenient taking a day off work to see your doctor.
