Remember to always consult your physician or health care provider before starting, stopping, or altering a treatment or health care regimen. Oh boy, you can only imagine the result!!! SonyaM - August This information is for educational purposes only, and not meant to provide medical advice, treatment, or diagnosis. I'd suggest, in addition to lots of water, lots of fresh fruits: Are you New to the forum? I can laugh now but I have never pooped so much in all my life and the stomach cramps were awful. If you would like to obtain more information about these advertising practices and to make choices about online behavioral advertising, please click here. You must be logged in to post. Try eating foods with high protine in. Read Next Dulcolax Laxative Reviews. I also suspected my prenatal vitamins were causing it I had changed pharmacies towards late pregnancy and got different kind. Stay away from apples and bananas. I had the same problem after delivery, but not for that long. Aug 14, - Hives, rash and difficulty breathing indicate an allergy to Dulcolax. Contact your doctor or seek medical attention right away if you or your baby experience any of these side effects after taking Dulcolax. When taking Dulcolax, it is important to increase your fluid and fiber intake to help regulate digestion and. Why am I constipated now that I've given birth? But give yourself a few days after delivery to start having regular bowel movements again. Also, straining during a bowel movement or passing a hard stool can cause or worsen hemorrhoids. Meanwhile, he has tons of poops, but they are small. His poop transitioned from the meconium to breastmilk poop. But, he has a small poop after each feeding, never a "big" poop. The nurse told me dulcolax draws more moisture into the colon. So, could that be causing him to pee less and poop the small Dulcolax vs. Colace-Constipation. It's common to feel constipated for the first few days after having a baby. But there's no need to put up with it. Find out what you can do to get things moving. - BabyCentre UK. If you're still having problems with regularity, here are some postpartum nutrition tips to help move things along. I sent SO to a pharmacy to see what else can be done and the suggested a dulcolax suppository ONCE only, just to get things going, and then continue with stool softeners after that. My sister was told when she had her babies to never use a suppository in the first month because your rectal tissue is too BM after c-section. I just took a dulcolax laxative as I'm badly constipated, then noticed it says to consult pharmacist or doctor before taking if breast feeding. Can't believe it didn't occur to me to check before I. I know this is infant care, but I figured I'd post this here since you have all delivered since delivering 12 weeks I was never constipated just after giving birth, but I was petrified to go! I sent my dh to the drugstore to get dulcolax for me however I didn't realize it was a laxative (I know total dingbat). Sixteen postpartum women who were not breastfeeding, but were producing at least mL of milk daily by breast pump were given either oral enteric-coated bisacodyl tablets (Dulcolax) 10 mg daily or oral liquid sodium picosulfate (Laxoberal) 10 mg daily for 7 days. Both drugs are prodrugs metabolized to the active drug. Many women find themselves unable to stay regular after they have a child. This is nothing to be concerned with and is considered to be perfectly normal. There is no need to be stressed about it because there are a number of resources you can use so you won't have any problems going to the bathroom. Additionally, there.
