No habit tendencies have been reported. Acyclovir and valacyclovir are equally effective as prophylactic therapy for herpes zoster. Do not take in larger amounts than advised. Monitoring of any undesired effects is necessary. Did you find this helpful? All information is for educational purposes only. Valacyclovir is superior to acyclovir in the treatment of herpes zoster. Use of high-dose intravenous Acyclovir MG Injection may increase the risk of neurotoxicity, especially in the elderly population with a neurological disorder, kidney or liver injury. Take Acyclovir MG Injection with or without food. Pediatric population - The safety and efficacy of the oral formulation of Acyclovir MG Injection has not been established in children less than 2 years of age. Clinical studies 5, 9 have shown an average reduction of the duration of pain from 60 days, as seen with acyclovir, to 40 days with valacyclovir. When not to use? Structurally, valacyclovir differs from acyclovir by the presence of the amino acid valine attached to the 5-hydroxyl group of the nucleoside. Seems like there is an error in your form. This site complies with the HONcode standard for trustworthy health information: Valacyclovir provides a useful alternative to acyclovir with the advantage of a more simple dosing regimen and the potential for better compliance 2. Missed Dose Take the missed dose as soon as you remember. Allergy If you have a known allergy to Acyclovir MG Injection or any other medicine belongs to the class anti-herpes virals.Sep 26, - Zovirax mg/1 Vial - 1Vial Injection (Acyclovir) drug information.
