Thyroid hormone replacement drugs including levothyroxine, liothyronine, and NDT are categorized as narrow therapeutic index (NTI) drugs. The goal of suppressive therapy is to keep your thyroid stimulating hormone (TSH) level low or nearly undetectable to help prevent recurrence of thyroid cancer. Your medication is an important part of treating your thyroid condition. While a generic drug has the same active ingredients as a brand name, the FDA states: Get a longer-term supply of your medication. Natural desiccated thyroid is a thyroid hormone replacement drug for hypothyroidism. If you have a personal relationship with your pharmacist, he or she may be willing to ensure that you get a generic from the same drug manufacturer with each refill. The FDA allows for as much as a 4 percent variation in potency, to account for different manufacturing processes. There are several reasons why you may find that you react differently to a generic drug as compared to a brand name. Again, because of differences in potency and inactive ingredients, you may respond differently to that medication. Mary Shomon, Patient Expert. The brand names of levothyroxine in the U.S. Bioavailability is a measure of the proportion of a drug that enters your circulation and is able to have the desired effect. Mylan Laboratories, approved for levothyroxine sodium tablets in a variety of strengths as a generic version of Synthroid; Sandoz Inc. The antithyroid drug PTU, used to treat hyperthyroidism, is only available as a generic in the U.S. According to the FDA, there are at least three companies making generic levothyroxine, including Lannett, Mylan, and Merck. For two decades, Mary has been a leading force advocating for more effective, patient-centered thyroid and hormonal health care. When you are taking a generic drug, this means that every time you get a refill, you receive whatever medication is in stock at the pharmacy. Representatives of all three companies said they would begin shipping their products immediately. They include dyes, fillers, flavors, and preservatives that are used to produce the pills. Thyroid drugs contain thyroid hormones and are used to supplement naturally occurring thyroid hormones in the body. They are used in the treatment of hypothyroidism (also called under-active thyroid disease), a common condition where the thyroid gland does not make enough thyroid hormone. Some thyroid drugs are ?Cytomel ?Armour Thyroid ?Levothroid ?Levoxyl. Sep 9, - Is generic levothyroxine as safe and effective as brand name thyroid drugs?
