They can only fill prescriptions issued by a physician licensed in a province or territory of Canada. If you have any questions about buying discount Cialis online or any other prescription products you can contact our team of professional Patient Service Representatives or one of our pharmacists by calling Manitoba pharmacists are not permitted to fill US physicians' prescriptions. Cialis is a prescription drug that can cause side effects. Monday to Friday 8: If at all any symptoms are observed, the medication should be stopped and due medical advice needs to be taken immediately. Cialis received FDA recognition in November and is being commercially produced since then. The medicine does not have to be taken with food. This is a prescription drug; therefore it is not available over the counter. Every pill of Cialis comprises of a combination of croscarmellose sodium, iron oxide, magnesium stearate, hydroxypropyl cellulose, lactose monohydrate hypromellose, sodium lauryl sulfate, titanium dioxide, triacetin and microcrystalline cellulose. Hence each time intercourse is planned the drug needs to be taken. The drug can be stored at normal room temperature. Closed December 24th 6: Hence it should never be shared between different individuals. As stated earlier, Cialis is a potent drug that affects on the biochemical processes in the body, therefore some side effects are likely. If patient experiences a sudden tingling in the chest or a pain or giddiness, and a numb feeling during sexual intercourse then it is a cause for worry. The precise reason why Cialis is not for self-administration is because over dosage can be harmful. Cialis is not given on a fixed schedule. Therefore when starting Cialis, patients must give all details of medicines being taken so that the doctor can plan the prescription accordingly. Mostly in such cases, the drug is simply not recommended as the risks can outweigh the benefits from the drug.
