Of course, it is always a good idea to talk to your doctor before trying any new medication. A doctor can also talk to you about prescription antihistamines, and if your symptoms persist immunotherapy, which can help desensitize you to what's causing a reaction in the first place. Inactive ingredients formulation 2: Zyrtec acts the fastest usually within one hour but is also the most likely to make you drowsy, so avoid driving, alcohol, and sedatives as you figure out how you react. Inactive ingredients formulation 1: With or without a decongestant, Allegra, Claritin, and Zyrtec are all antihistamines, meaning they calm down your body's immune reaction to allergens like pollen or animal dander. Do you need a decongestant? Claritin-D, Allegra-D, and Zyrtec-D all contain a decongestant called pseudoephedrine, the same active ingredient that powers Sudafed. Lauren F Friedman , Tech Insider. So which one should you choose? Follow Tech Insider on Facebook and Twitter. You can also find out whether any of your other medications will interact with Allegra , Claritin , or Zyrtec. I also appreciate likes and follows. I treat products for sleep and allergy relief equivalently, since they're share the same active ingredient, usually in similar amounts. Due to inactivity, you will be signed out of Walgreens. If your primary symptom is a stuffed up nose, you can also ask your doctor about decongesting nasal sprays. Capsules are imprinted with edible dye-free ink. Sign in or Register. Benadryl Allergy Dye-Free Liquigels.Item 1 - 27 of - Benadryl at Walgreens. Benadryl (diphenhydramine) is an antihistamine used to treat symptoms of seasonal allergies including sneezing, runny nose, and itching or watering eyes. It works by blocking the action of histamine which causes allergic symptoms. It is available over-the-counter, and also sold as generic diphenhydramine. Compare.
