The insurance company also won't care because they set up the reimbursement rate with the pharmacy long ago, so it's the pharmacy that gets hit with the extra cost. And this isn't the first time I've seen this happen with a medication -- just the first time I've documented it by copying the screen. Especially when, as we saw, these prices don't have to make any sense and can change dramatically for no reason without warning. So the pharmacist is probably unaware of the fact that another dose of the same medication might be a lot cheaper. But there are still tricks they can use if you're not careful. If you do decide to pay cash for your medications, make sure to check the price each time before refilling your medication. Compare prices at local big-box stores, check prices online and even look for coupons. If the price of gasoline goes up by 50 cents a gallon it's all over the news. The Bottom Line priced several popular prescription generics and found consistently low prices at Costco but frequently less expensive elsewhere if they are on other retailers' lists of low-cost medications. Eligibility requirements vary for each program. Check first with the local Costco, Wal-Mart, Walgreens or Target or review their generics price list online. This is a drug discount program, not an insurance plan. If only a brand-name is available, ask the doctor's office if it has any coupons. Oral Tablet 25 mg losartan oral tablet. Patient assistance programs PAPs are usually sponsored by pharmaceutical companies and provide free or discounted medicines to low income or uninsured and under-insured people who meet specific guidelines. Why was the price of mg Irbesartan almost 30 times the price of the 75 mg dose for 90 pills and nearly 10 times the price of the mg dose. Watch these local retailers beat your insurer's co-pay. They also know that they can make a lot of money for a short time each time they do this. When there is a range of pricing, consumers should normally expect to pay the lower price. Prices for brand-name drugs increased almost 15 percent last year, generics less than 5, according to a study by Truveris, a research firm. Losartan is an angiotensin II antagonist, the first to be marketed and generally prescribed by doctors for the treatment of high blood pressure especially for the under 55 The most common short term side effects of Losartan include upper respiratory infections, stuffy nose, dizziness, and back pain.
