It is not an unusual thing to find a mother infected from the vaginal discharge of her young child for whom she has been caring. By going over somewhat in detail the many ways in which infectious material may be trans- ferred to the eyes, we shall be materially aided in formulating preventive measures. In a case I saw not long since, infection could be traced directly to this source. A little girl, about two years of age, had what was supposed to be an ordinary inoffensive vaginal discharge, and the mother undertook the care of it ; a few days later she developed a most virulent type of blennorrhcea, which rapidly wejit on to complete destruction of the cornea and loss of the eye Tylenol Sinus Coupon in one week from the onset. If some of my hearers who have not had a wide experi- ence in ophthalmic work, could see how rapidly the cornea melts away, with complete destruction of the eye, in some of the more virulent cases, my appeal, I feel sure, would not be in vain. The general practitioner should be as much interested in this condition as the ophthalmologist, for to him these patients usually first present themselves for treatment. Tylenol Precise Coupons It is of importance that the contagiousness and virulent nature of this disease be fully compre- hended, for then we are able to approach the treat- ment Tylenol Precise Pain Relieving Cream more understandingly and manifestly with greater success.
