I have notice that seasonal issues slowly begin to reappear. Also the only popular antidepressant I know that doesn't affect sex drive in a negative way like SSRIs. With the Budeprion XL, I have no such effects and the drug works very well. For Major Depressive Disorder "I have been on bupropion xl for 5 days. I started taking the mg XL generics - the symptoms returned. Within the first 4 days I started having mood swings. I feel much better and I didn't even know I was depressed. I switched to the generic because my insurance carrier recommended me to do so. Probably should have given it more time to kick in. I found a few of the other brand and took them and felt great but now I'm back to this most recent refill and it's awful. The drowsiness I experienced from the medication was also getting unbearable. I'd be angry one minute, cry the next, and then I'd be fine. After two weeks, the mood swings decreased a bit, but I started to space out, and began to experience some significant short term memory loss.
