Originally posted by Hogulus It was also most like I was buzzing off bud or something. Still it wasn't like what I read and people told me about. My first real high was from vicodin. Hog here, telling you about my first real experience EVER with drugs. I got anxiety from taking them, not sure why, I guess cause it was something new and I read alot about it. You will be able to appreciate these drugs much more when you have some experience with street or illegal drugs such as marijuana. I'm not addicted or anything, haven't taken any whatsoever since September and the time before that was February or so and don't plan to. Opiates sometime are an "aquired high" if that makes any sense. Plus its very dangerous, and stupid. Don't worry, I won't be mixing it with any booze, too young for booze. My experience with vicodin and other pain killers suggests that they grow on you. So finally I had to piss and I get up and I was slightly lightheaded and feeling good. I was planning on going to Erowid, too Feeling quite tired and peaceful. My room was completely dark, other than the light of my monitor.

Jul 2, - Last week, a federal advisory panel recommended that Vicodin be banned. Why? It also makes stressed people feel groovy: One movie studio's execs celebrated Vicodin Fridays in the nineties. A warm, fuzzy Vicodin First medical use of acetaminophen, derived from a by-product of coal-tar distillation. Hydrocodone/paracetamol, also known as hydrocodone/acetaminophen or hydrocodone/APAP and marketed under the trade name Vicodin among others, is the combination of an opioid pain medication, hydrocodone, with paracetamol (acetaminophen). It is used as a prescription drug to relieve moderate to severe pain. ?Uses ?Side effects ?Pharmacology. However, extensive and poor cytochrome CYP2D6 metabolizers had similar physiological and subjective responses to hydrocodone, and CYP2D6 inhibitor quinidine did not change the responses of extensive metabolizers, suggesting that inhibition of CYP2D6 metabolism of hydrocodone has no practical importance. history of hydrocodone Vicodin is one of the most popular prescription painkillers and one that is frequently abused. This drug contains up to six times the typical dose of hydrocodone (approximately five milligrams), plus milligrams of acetaminophen. While hydrocodone was first discovered in the s, acetaminophen.
