Variation in treatment for patients with pediatric morphea illustrate the need for guidelines [https: Coordinated care lessons in dermatology from Dr. This new economic reality strikes at the heart of the service we dermatologists provide for our patients. Strowd of wakehealth \[https: Ruler is better than eye for pigment measure \\[https: Please tell us in this quick poll. At first I was highly doubtful and assumed that the dispensing pharmacy had mistakenly substituted a name-brand product for the generic version I had prescribed. Dermatology Times Dermatology Cost of care. Anonymous Sep 16, I am not sure who is responsible for reducing prices for generics. Mid-Level Providers in Practice As the demand for dermatologic services continues to grow, so does the use of non-physician clinicians in dermatology. ModernMedicine reserves the right to use the comments we receive, in whole or in part, in any medium. Without any particular expertise, but with an advanced case of paranoia, I think it is most likely that big pharma has bought out the smaller manufacturers of generics and has eliminated the competition that has kept pharmaceutical prices affordable. If dermatologists decide against treating skin conditions with effective prescription medications, who will be capable of treating complicated conditions? In this particular instance, I reluctantly substituted fluocinonide cream for the clobetasol, knowing that it was unlikely that he would re-pigment while on this therapy. He also is a member of the Dermatology Times Editorial Advisory board In a conversation with a recently trained colleague, he indicated that some of his fellow residents intend on not writing any prescriptions, but instead will provide only surgical and cosmetic care. I bet you the pharmaceutical companies would get the message. Clobetasol \\\(Clobex, Olux, Clodan, Cormax, Temovate, Embeline\\\) is an expensive steroid used on the skin to treat itching, redness, and swelling caused by some skin conditions.
