All parameters were analyzed, and only those with highest influence on ICER are displayed. Markov model showing potential transitions between health states. *Am Heart J* ; This is a preview of subscription content, log in to check access. NICE guidance on clopidogrel and modified-release dipyridamole for the prevention of occlusive vascular events included an assessment of the cost effectiveness of clopidogrel for secondary prevention in people with ischaemic stroke. The Prescription Cost Analysis report does not include data on the indications for which the drugs are prescribed. The world health report - changing history. This study sought to estimate the cost-effectiveness of the clopidogrel-aspirin regimen for acute TIA or minor stroke. Supplemental Content Full text links. Although the CHARISMA trial did not find a benefit of adding clopidogrel to aspirin in its overall study cohort, a benefit was suggested in a prespecified subgroup of patients with established cardiovascular CV disease. Long-term cost effectiveness of platelet inhibition with clopidogrel in patients presenting with acute coronary syndromes: World Health Organization; Health and economic benefits of increased beta-blocker use following myocardial infarction. Prevalence and clinical correlates of peripheral arterial disease in the Framingham Offspring Study. For additional information, or to request that your IP address be unblocked, please send an email to PMC. National Center for Biotechnology Information . *U J Am Heart Assoc.* Jun 5;3(3):e doi: /JAHA Cost-effectiveness of clopidogrel-aspirin versus aspirin alone for acute transient ischemic attack and minor stroke. Pan Y(1), Wang A(1), Liu G(1), Zhao X(1), Meng X(1), Zhao K(2), Liu L(1), Wang C(1), Johnston SC(3), Wang Y(1), Wang Y(1);. Clinical effectiveness and cost-effectiveness of clopidogrel and modified-release dipyridamole in the secondary prevention of occlusive vascular events: a systematic review and economic evaluation. Jones L(1), Griffin S, Palmer S, Main C, Orton V, Sculpher M, Sudlow C, Henderson R, Hawkins N, Riemsma R. Objective. To determine the incremental cost-effectiveness of clopidogrel plus aspirin (C + A) compared with aspirin (A) alone during the Clopidogrel for High Atherothrombotic Risk and Ischemic Stabilization, Management and Avoidance (CHARISMA) trial from a US payer perspective. Clopidogrel is more effective than aspirin in preventing recurrent vascular events, but concerns about its cost-effectiveness have limited its use. We evaluated the cost-effectiveness of clopidogrel and aspirin as secondary prevention in patients with a prior myocardial infarction, a prior stroke, or peripheral arterial disease. Cost-Effectiveness of Clopidogrel plus Aspirin versus Aspirin. Alone for Secondary Prevention of Cardiovascular Events: Results from the CHARISMA Trial. *Chen, MD, MPH,1 Deepak L. Bhatt, MD,2 Elizabeth Schneider Dunn, MPH,3 Chunxue Shi, MSc,4. J. Jaime Caro, MD,5 Elizabeth M. Mahoney.* The objective of this study was to carry out short- and long-term cost-effectiveness analyses of administering clopidogrel in addition to standard therapy during the first year of treatment. Patients and method. For the short-term analysis, clinical data and information on health resource utilization were taken from the CURE. Cost-Effectiveness of Clopidogrel. Christopher P. Cannon. Cardiovascular Division, Brigham and Women's Hospital, Boston MA, USA. Atherothrombosis is the leading cause of death worldwide, responsible for 22% of all deaths annually. [1]. Ischaemic vascular events such as myocardial infarction (MI) and ischaemic stroke. genotype and the risk of major bleeding in warfarin users. Additionally, interviews with local key cardiologists were undertaken. A threshold analysis was performed for patients aged 45 years old using the previously constructed decision analytic model. The model was populated from the societal perspective. Input data. Mar 31, - The objective was to determine the long-term cost-effectiveness of clopidogrel plus acetylsalicylic acid (ASA) compared with ASA alone. The authors concluded that clopidogrel plus ASA therapy was cost-effective compared with ASA alone. Overall the methodology was good and both the results and the. CostEffectiveness of Clopidogrel Plus Aspirin for Stroke. Prevention in Patients With Atrial Fibrillation in Whom Warfarin. Is Unsuitable. Craig I. Coleman, PharmDa,c,e,* , Andrew D. Straznitskas, PharmDa, Diana M. Sobieraj, PharmDa,c., Jeffrey Kluger, MD,b,d, and Moise W. Anglade, MD,e. Guidelines for atrial fibrillation.
